

CAENIB-BP

Blank Cover Plates for CAENIB Automation Enclosures, 5-Pack

Designed for the **CAENIB** Series Automation Enclosures, these blank plates are used to fill the holes in the enclosure cover panel in front of any terminal block position that does not have a CLTIBN type circuit breaker terminal block installed. A set quantity of blank plates is included with each enclosure. The CAENIB-BP provides 5 additional blank plates and hardware.
